

# Extras

## Gifts and souvenirs.

Promotional products such as mugs, water bottles, pens and bags, are some of the little extras we can label. They are great gifts for anyone, especially for that employer who wants to give to his/her employee(s).

# Art submission

## Making the process easy.

Artwork can be submitted via email, by disk, or paper. For best results we prefer vector art, however, if you're submitting bitmap the image must be crisp and clear at 100% in size and with a pixel resolution of atleast 300 dpi. If such be the case that the artwork is not in good quality, we will have to redo it digitally for an extra fee.

# What we do.

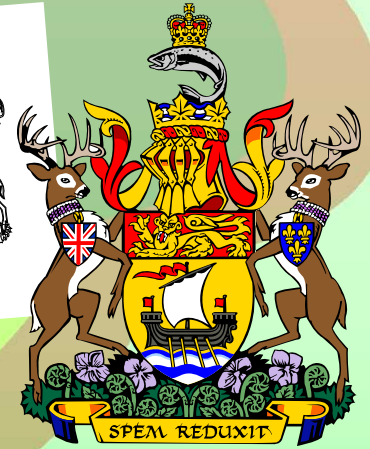

## Want that in ink or stitches?

Straight to the point, we cater to the person, group or company who requires the service of professional design print for clothing or product. Our imprint service consist of embroidery, vinyl graphics, heat pressing, garment printing and screen printing.

## Can't design it? We can!

We even create logos and graphics for anyone who just needs a design. We can create a pencil or digital drawing from scratch for just about anything. Whether you want a scenery, a fresh new logo or an existing design cleaned up, we can help.

## You do the advertising!

Sticking an ad in the newspaper for a limited amount of time can be costly, whereas placing it on a shirt for a one-time fee will last for a long time. We can see why more and more businesses prefer this method of advertising over the traditional way.
